

# Invia<sup>®</sup> Motion<sup>™</sup> NPWT System

## SINGLE-PATIENT-USE CONVENIENCE WITH REUSABLE PUMP PERFORMANCE

### Single-patient-use convenience

- **No need to clean** and sterilize a used device
- **No risk of cross contamination** associated with reusable devices
- **Compact** design for **comfort** and **mobility**

### Reusable pump performance

- **Intelligent** Pressure Control from the pump to the wound site<sup>1</sup>
- **Dynamic** Exudate Removal helps prevent blockages from the wound site to the pump
- **Canister based system** for efficient exudate management

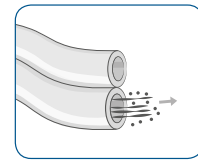

**Invia Motion provides an efficient solution to support clinicians with Negative Pressure Wound Therapy management in all patient care settings.**

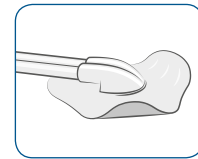

The Invia Motion delivers the convenience of a personal, single-patient-use pump while offering clinical flexibility with a choice of pressure settings, therapy modes and compatibility with both foam and gauze dressings. The Invia Motion is appropriate for use in all patient care settings and eliminates the need to retrieve, clean, and maintain equipment from one patient to the next. The compact design and quiet operation helps patients to comfortably go about daily activities for the duration of therapy.

Invia Motion delivers therapy confidence. With a double lumen tubing design from the pump to the wound, the pump actively controls the set pressure at the wound site. In addition, small blockages in the tubing are resolved by the pump with assurance that clinicians and patients will see and hear notifications for any unresolved blockages.

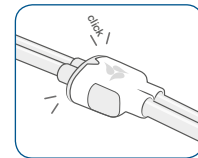

The **Quick-connector** interface provides **easy and secure** attachment<sup>2</sup> between the dressing tubing and the canister tubing.

Double lumen to the wound

FitPad

Quick-connector

**Key features at a glance**

- One NPWT System for all wound types
- Providing NPWT in the hospital, in transition, and at home
- Clear user interface supported by 4 buttons and a digital display
- Discrete carrying case, battery autonomy of 10 hours and compact design for comfort and mobility
- Preset pressure settings from -40 to -175mmHg (-125mmHg default setting)
- Easy and secure tubing attachment with the Quick-connector
- Choice of therapy runtimes to meet clinical needs

**Technical data**

	Medium vacuum - 40 mmHg to -175 mmHg		Battery life > 10 Hours	Modes: Constant and Intermittent Tubing: Double Lumen Tubing Canister: 150 ml Canister/Tubing set
	Low flow 1 l/min.		350 g 0.88 lbs without canister	
				H x W x D 99 x 98 x 52 mm 3.90 x 3.86 x 2.05 inch
2-year warranty
